## Principales "familias" de métodos\*

\* para organismos no modelo...es decir, sin recursos genómicos previamente disponibles!

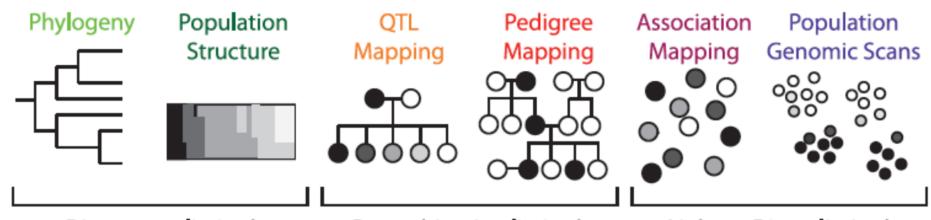

## Fraction of genome

Sanger / UCE
sequencing
Rapture / RADcap

ezRAD / ddRAD / 2bRAD

Whole genome re-sequencing

RADtag (Baird 2008)

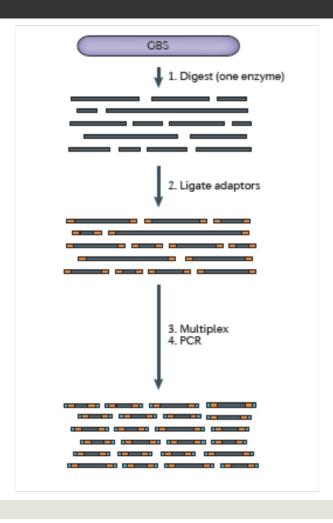

Divergence limited

Recombination limited

Linkage Diseq. limited

## GBS: Genotyping By Sequencing

## RADseq vs. ddRAD
